

Introducing The Amazing Dynamic Turbo Travel Tools

The One Boutiquely Complete Resource For Travel Management.
It should be a integral component of your company's travel program.

Dynamic Key Ring

Tools are always with you when traveling or at the office, 24 hours a day. Dynamic Corporate Travel Solutions has been **providing live updates to PDAs or**

cell phones long before the it became fashionable to "brag" about it. We often wonder where those travel websites got this great idea in the first place!

Dynamic Swivel Adaptor

Like the swivel thingy pictured here, Dynamic Turbo Travel Tools are infinitely adaptable to your corporate culture while catering to the individual

traveler's requirements. This feature is **key to supporting cost reducing travel policies** with complete flexibility.

Dynamic Protective Enclosure

When its all said and done, Dynamic has you covered: before, during and after your travel. **Fixing disrupted air travel plans**, last minute

itinerary changes, automatic upgrades, negotiating with service providers – everything. We call it "Boutique" service, the way things ought to be.

Dynamic Driver Set with MagLoc Customer Service

Streamline travel procedures and you are ready to Lock & Load 24/7/365 – Arrange complete trip reservations in harmony with policy specifications at the lowest possible cost. Schedule reservations online or within moments of reaching out to your dedicated

travel agent by phone or email. Change your itinerary on short notice and still **capture and reconcile all travel expenses automatically**, and send the information along to finance. WOW!

Dynamic X-Ray Vision

The **Dynamic X-Ray Vision** component reveals the "unseen world" of real-time airline inventory not available to the public on any web site. An example of this integrated tool: flights are cancelled on a system-wide basis and our clients need to finish their itineraries. Our agents interface directly

with the Airline General Distribution System, the traditional inventory management environment of the carriers. It's literally like **snatching seats out of thin air** in the ever changing world of air travel inventory availability. We Dynamically adapt to your current situation.

Dynamic Measuring System

"**Measure It To Control It**" is at the heart of the **Turbo Travel Tools** system. What did that trip really cost? Did your travelers miss any opportunities to save? Find out with our complete reporting and financial tools, integrated seamlessly with your financial systems.

Infinitely adaptable to any accounting constraint; able to track as many custom data points as you desire. Credit card reconciliation, project accounting, client billing, all are automatically possible with this important feature set.

Easy to use, comprehensive online reporting is available with **downloadable spreadsheets** to link directly with your internal systems.

Warnings & Precautions

Do not stare into the LED light as this may cause blindness. Similar to that sage advise about not staring into the sun.

Don't use the Dynamic Driver Set (or any other parts) for any dental procedure, ever. The tools have not been approved by the **FDA**.

Don't measure things bigger than 38" (or 1 meter while traveling in Europe) with the measuring tape. Doing so will give an inaccurate measurement and may damage the Dynamic Turbo Travel Tools.
